DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114 was filed in this application after appeal to the Board of Patent Appeals and Interferences, but prior to a decision on the appeal. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on August 18, 2005 has been entered.

Claim Objections

2. Claims 1 and 18 are objected to because of the following informalities: in claim 1, line 4 and in claim 18, line 5, "an a" should read -- and a -- and in claim 18, line 4, "a container body" appears twice. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrase "a track comprising a fastener portion" is confusing. It appears from the disclosure that the track is part of a portion of the fastener.

Claim Rejections - 35 USC § 102

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

5. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Hupp (WO 01/51378).

To the degree set forth in the claims and given the broadest, reasonable interpretation,

Art Unit: 3727

the inclined surface of the fastener is a ramp. Moreover, the portion 64 is also a ramp that extends from the first end of the closure further having an inclined surface extending out of the plane of the fastener.

Regarding claim 17, a portion of the fastener lies in multiple planes, thus defining more than one plane.

Allowable Subject Matter

6. Claims 18-20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Response to Arguments

7. Applicant's arguments filed August 18, 2005 have been fully considered but they are not persuasive. The amendments to claim 1 do not clearly set forth the "ramp proceeds at an angle from the plane defined by the cover of the container when the fastener of the container is engaged between the cover and the body" as applicant asserts in paragraph 2 of the remarks.

Conclusion

8. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at (571) 273-8300. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Group 3720 will be promptly forwarded to the examiner.

9. It is called to applicant's attention that if a communication is faxed before the reply time has expired, applicant may submit the reply with a "Certificate of Facsimile" which merely asserts that the reply is being faxed on a given date. So faxed, before the period for reply has expired, the reply may be considered timely. A suggested format for a certificate follows:

I hereby certify that this correspondence for Application Serial No. _____ is being facsimiled to The U.S. Patent and Trademark Office via fax number 571-273-8300 on the date shown below:
